To Our Patrons

You will find this catalogue contains many new articles, some of which are strictly original. This will assure our patrons that we are continually developing new Business Systems in order to stay abreast of the business world which is constantly looking forward to new and improved Business Methods. Our Mr. Wagemaker takes it upon himself to personally visit the trade, Business Shows, etc., two or three times a year, in order to learn of any new device which may be developed into a practical article for the office, and at the same time noting such improvements that could be made in our present line. This we claim to be an advantage which enables us to always lead in quality, workmanship and finish.

Twelve years ago the Wagemaker Company was organized to manufacture Filing Devices and Card Record Systems with supplies. This company started with the one ambition—"Quality" plus a reasonable price. Step by step they forged onward against all competition, and today they stand recognized for "Quality"—found in all of their goods—represented by the leading stationers and desk houses in the country.

All of our goods are manufactured of woods carefully selected for figure by expert workmen. The most up-to-date machinery is used throughout our plant in constructing our furniture, so that each operation is done with the utmost skill. Our lumber is thoroughly kiln dried before using. We pay the highest price for Glues, Stains, Fillers, Varnish, etc., but best of all, we have the advantage to obtain the highest type of skilled mechanics in this city—the city that is known throughout the world for its furniture industries. We are therefore justified in stating that it is impossible for any one, regardless of cost, to purchase a better article in this country than the goods we manufacture.

Wagemaker

Book on
"Filing Systems"

Size of book, 8 x 10 in.

Get this book—
it is valuable

Published by us and written by Isaac Wagemaker, our President, contains over 200 pages of valuable information how an office can be systematized and equipped with the most modern filing devices and business methods. It's 90 colored plates and 110 black illustrations, covering hundreds of subjects, will do more for you than a personal visit from many an expert. The price is \$4.00 net, express prepaid. Should it suggest even one small change in your present system, it will repay you ten fold. Write for literature.

Terms and Prices

Prices

All prices will be found on separate price list.

Shipments

We allow freight charges to your nearest freight depot on orders of 100 pounds or more. Upon all orders for less than 100 pounds and also for goods shipped by express, we will allow freight pro rata in lieu of transportation charges. Goods will then be shipped F. O. B. cars, Grand Rapids, Mich.

Freight Prepaid on Shipments

When Remittance Accompanies Order, we will prepay all freight charges to destination on shipments of 100 pounds or more. We can not guarantee delivery or assume liability of damage which may occur in transit. Our goods are most carefully packed by experienced packers.

Freight Not Prepaid—When remittance is not sent with order, freight charges are to be paid by customer at destination and amount deducted from invoice. **The Railroad Company's receipted expense bill must always accompany the remittance**, when making a request for credit.

N. B.—We do not pay cartage or delivery charges at destination.

Prepaid Express

We prepay express shipments when by so doing we can secure for you a smaller amount of charges and add the amount of same to invoice of goods.

Terms and Credit

To responsible parties goods will be billed net cash and we expect remittances in full, promptly upon receipt and inspection of goods at destination. Customers having no established credit rating will facilitate prompt shipment of orders by sending remittance with order. Remember you take no risk in so doing, as we guarantee satisfaction. Our rating in either R. G. Dun's or Bradstreet's Agency Books show that our **Guarantee is Good.**

"The sweetness of low prices never equals the bitterness of poor quality"

General Information

Our Guarantee—All of our systems are POSITIVELY the most modern in use. Every article of furniture is guaranteed to be of the most artistic design, made from selected, thoroughly kiln-dried material, showing fine grain effects, practical and durable in construction and of the best workmanship obtainable. If, after the most critical inspection, any of our goods and systems do not prove all we claim for them, they may be returned at our expense.

General Appearance—On account of superior construction and finish, our cabinets when installed in large offices present a rigid, compact and symmetrical appearance, seldom equalled, never excelled by any other line.

Dust Proof Top and Bottom Construction—Every section is constructed with closed top and bottom, and all filing drawers are made with LIP FRONTS, making them absolutely DUST PROOF. Where sections are made with closed top and bottom, drawers may be LOCKED INTO THE SECTIONS safe-guarding the contents, which cannot be accomplished where sections are made with intersection strips only at top and bottom and so left open, that by removing an upper section, the contents of a locked drawer underneath can be examined or removed without unlocking the drawer. See page 7.

Drawer Construction—All drawers are constructed with a "Dovetailed" and "Locked Corner Box Joint." No "Tongue and Groove" or so-called "Rattail" drawer construction is allowed or permitted in the WAGEMAKER CABINETS.

Drawer Finish and Operation—The drawers of "Wagemaker" Cabinets are finished (both inside and outside) with a specially prepared material. Drawers thus treated not only present a beautiful white appearance, but a smooth, hard surface which guarantees a free running drawer at all times of the year. This prevents any chance of drawers becoming gummed, swelled or sticky, the usual result of a cheap varnish finish during hot weather or wet, damp conditions.

The Celebrated "Wagemaker" Reducing Section—Dealers find by using this Reducing Section intelligently that they can fill their orders promptly and satisfactorily out of a much smaller stock of our goods than is required to handle the same amount of business from other lines. This is made possible for this reason: Our Reducing Section is separate and detached from any other section, while the usual reducing device of most other lines is SOLIDLY ATTACHED TO OR IS A PART OF A REGULAR SECTION. By placing OUR REDUCING SECTION on to any of our 24 inch sections, we can reduce to an 18 inch section and from that to a 14 inch section, placing in between as many sections of different styles as desired and which can be rearranged at will. Whereas, using a solidly attached Reducer, a dealer is obliged to carry in stock a larger assortment to supply the changing needs of his customers; he is also often compelled to exchange sections with a customer who is not willing to buy an extra new section in order to get the desired Reducer. See opposite page.

"Wagemaker" Ball-Bearing Extension Slides for Vertical Filing Drawers—The ball-bearing attachment for our large Vertical Filing drawers, shown on pages 12, 20 and 26, is one of the best improvements in our line and is the only device of it's kind which has ever been developed that proves so practical and durable for the purpose intended. Even though these large filing drawers are heavily loaded with papers (as they are sure to become when filled) by means of these ball-bearings they operate in and out of cabinets with the most perfect ease. They cannot twist, bind, swell nor warp. The roller bearing on each drawer has 10 points of contact, 5 on each side of drawer, raising the drawer above all frame work, which eliminates all friction. The bearings are made of metal, "not fibre."

Description of Exterior Finishes and Hardware Trimmings

Our Satin Dull Rubbed Finish has made our line very popular. The color is a light golden Oak, very transparent, and will match the color of all the latest made desks. There are several grades of this style of finish on the market, but our customers always know that we invariably choose "THE BEST EVER" when it comes to a question of Material, Construction or Finish.

Cast Brass Hardware—Our Dull Finish Line is trimmed with Cast Brass Hardware, of most elegant design, of "Dull Brass" or "Old Brass" color.

Special Finishes to Order—Our regular stock can be finished to match the finish of any office furniture or wood-work. Furnish us a sample of the color desired and we will match it to the satisfaction of the most critical customer.

The Exterior of Our Regular Stock Goods is made of SELECTED QUARTER-SAWED WHITE OAK, BIRCH MAHOGANY FINISH, OR SOLID MAHOGANY, WELL SEASONED AND THOROUGHLY KILN DRIED.

All Interior Construction of Cabinets (including drawer sides, backs and bottoms) are made of hard wood (well seasoned and thoroughly kiln dried), excepting the bottoms used in the large drawers, which are made of "three ply" hard wood veneers, $\frac{1}{4}$ inch thick.

All frames, partitions, drawer guides, mouldings, backs, etc., are constructed with a "dado", well glued and nailed (where necessary) and in such a manner as not to deface exterior of cabinet.

How to Order

In purchasing Filing Cabinets and Card Record Systems on the "Single Unit" or "Expansion Principle," it is necessary to buy for present needs only; other sections of the same design and finish can be added as the expansion of your business demands.

To avoid errors, delays and unnecessary correspondence, please observe the following instructions:

1. Always order by Article No. To save confusion, give at beginning of order Catalog No. from which articles are selected and page. It is not necessary to cut out or mutilate our catalog in order to send us cuts of sections desired.
2. All sectional or solid cabinets illustrated in this catalog (unless otherwise specified) are quoted without supplies. (All supplies will be found in catalog No. 109.)
3. Be sure and order Base and Top units when ordering a new stack.

Illustration Shows How a "Stack" May be Set Up

Top Section—Carried in three sizes. Shown on page 8.

Card Index Section—18 inches deep. 5 drawers, 3 x 5 size. Shown on page 9.

Reducing Section—This is an entirely separate section, carried in three sizes, and may be placed between any section in the standard line. A distinct feature used only in the "Wagemaker" sections. Described and shown on pages 6 and 8.

Shelf Section—A valuable addition to any stack, for holding card drawers, making entries on cards, for sorting and distributing matter through the files, etc. Shown on page 8.

Vertical Filing Section—24 inches deep. Letter size. Drawers operate on "ball-bearing" supports. Shown on page 12.

Base Section—Carried in three sizes. This artistic design adds to the general appearance and raises the stack above the floor. Can be furnished with casters, if desired. Shown on page 8. See Sanitary Bases on page 16.

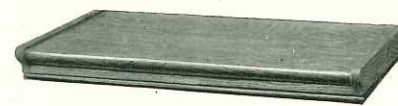

Standard Line

Plain Top Section

No.	Depth	Code	Weight, Boxed
No. 1½	14 in. deep	Sesmar	5 sec., 40 lbs.
No. 2½	18 in. deep	Sesmaria	5 sec., 45 lbs.
No. 3½	24 in. deep	Sesosis	5 sec., 50 lbs.
Height, 1½ in.; width, 31½ in.			

Regular Top Section

No.	Depth	Code	Weight, Boxed
No. 8½	14 in. deep	Setolinata	5 sec., 75 lbs.

"Stands for Quality"

Wagemaker

"Stands for Quality"

Our Wagemakeretts

Wagemakeretts are found indispensable to the professional man, heads of departments, the small business man and all business men that need a stack of small sections with limited capacity to begin with.

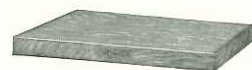

These Small Sections are the "missing link" which has been found to prevent further loss of letters, documents and other valuable papers, heretofore filed or placed into any old box, desk drawer or transfer volume, improperly labeled or indexed, simply because the expense and capacity of the regular filing devices were too great.

Size of Section—17½ inches wide by 20½ inches deep. Made of selected figured quartersawed White Oak, Birch, Mahogany finish, or solid Mahogany. Furnished in our new Satin Dull Rubbed finish and Cast Brass Hardware. These sections are made with the same care as our standard sectional line, described on pages 6 and 7.

Construction—We have made this line, "Wagemakeretts", of a width so that every section has full drawer capacity, "no waste space". The legal blank sections have drawers with two compartments, each compartment measuring full 9 x 15 inches. The Cap Size Vertical File Section, on page 21, you file from front to back, "not side ways," giving you full capacity. The Document File Section has partitions between the drawers, preventing any unsightly openings. The same thing is true of all other sections. In fact, the entire line, piece by piece, has been carefully designed to meet every requirement to its full extent.

To Prevent Tipping Over, we use a hook at the rear of sections. All sections have closed tops and bottoms. 3-ply veneered backs, well finished so they can be set in the center of an office, giving a rich effect at rear as well as other parts of sections.

Wagemakeretts

Top Section

No. 300 Code Singlaria Weight, Boxed 5 sec., 25 lbs.
Height, 1½ in.; width, 17¾ in. 20½ in. deep

Top 3-ply veneer, finished all around. Constructed with mitred corners.

Low Sanitary Base

No. 301 Code Singlest Weight, Boxed 5 sec., 60 lbs.
Height, 6 in.; width, 17¾ in. 20½ in. deep
legs, 2¼ in. square.

This style of base will raise the sections above all dust and dirt.

All drawers finished inside with our special wood preserver

Remember you purchase capacity--not simply a stack of sections

Stack No. 6

Consisting of:

1 No. 301, page 18; 1 No. 309, page 20;
1 No. 306, page 20; 1 No. 304, page 19;
1 No. 300, page 18.

A stack for the busy man, next to his desk.

High Sanitary Base

No. 302 Code Singleton Weight, Boxed 2 sec., 45 lbs.
Height, 18½ in.; width, 17¾ in. 20½ in. deep
legs 2¼ in. square.

Used to raise the sections at a convenient height for reference. This table we ship K. D., and can be set up by screwing in the bolts on inside of frame.

Stack No. 11

1 No. 300, page 18; 1 No. 305, page 19;
1 No. 315, page 23; 1 No. 302, page 18.

We wish to call your attention to the symmetrical lines embodying the entire stack.

Description given on pages 6-7-17
See separate Price List

Wagemakeretts

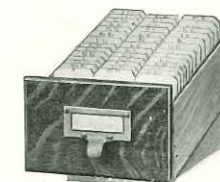

Card Index Section

FOR 3 x 5 CARDS

No. 303 Code Singolare Weight, Boxed 2 sec., 40 lbs.
Height, 4¾ in.; width, 17¾ in.; depth, 20½ in.

The piece between the drawers is a blank. See No. 304 with small drawer in center. Drawers have dovetailed and lock cornered joints.

Card Index Drawer

All drawers have the sides lower than the front, this expedites the handling of cards.

Our Name represents quality

Card Index Section

FOR 3 x 5 CARDS

No. 304 Code Singpult Weight, Boxed 2 sec., 40 lbs.
Height, 4¾ in.; width, 17¾ in.; depth, 20½ in.

This section is the same as No. 303 with the exception that it has a small stationery drawer in center.

All Drawers fitted with our improved Adjustable Follow-er Block.

Card Index Section

FOR 3 x 5 CARDS

No. 305 Code Singrante Weight, Boxed 2 sec., 80 lbs.
Height, 12¾ in.; width, 17¾ in.; depth, 20½ in.

Section contains six 3x5 drawers and one flat letter file drawer fitted with index if desired, at small extra charge, see page 22.

Card Index Section

FOR 4 x 6 CARDS

No. 307 Code Sinim Weight, Boxed 2 sec., 45 lbs.
Height, 5¾ in.; width, 17¾ in.; depth, 20½ in.

Section contains two 4x6 drawers of very large capacity. The drawers have lip fronts with cast brass trimming.

Description given on pages 6-7-17
See separate Price List

Stack No. 4

Consisting of:

1 No. 301, page 18; 1 No. 314, page 22;
1 No. 309, page 20; 1 No. 311, page 21;
1 No. 307, page 19; 1 No. 304, page 19;
1 No. 300, page 18.

This Stack has a great capacity in a small floor space.

Our drawers have plenty room in the openings --the lip front on all drawers gives us this advantage

All sections have 3-ply veneered back, well finished

Stack No. 12

Consisting of :

- 1 No. 302, page 18; 2 No. 309, page 20;
- 1 No. 304, page 19; 1 No. 300, page 18.

This is a Stack that most anyone can use to advantage.

Vertical Filing Section

(LETTER SIZE)

No.	Code	Weight, Boxed
No. 309.	Sinistrar	2 sec., 80 lbs.
Height, 12 $\frac{3}{4}$ in.; width, 17 $\frac{3}{4}$ in.; depth, 20 $\frac{1}{2}$ in.		
Drawers are 10 $\frac{1}{2}$ in. high by 12 in. wide inside.		

The drawers are suspended on a full set of Roller Bearing (see illustration). Center rods and adjustable follower. Supplies may be found in No. 109 catalogue.

Description given on pages 6-7-17.
See separate Price List.

Card Index Section

With 1 drawer 5 x 8 and 1 drawer 4 x 6.

No.	Code	Weight, Boxed
No. 308.	Sinister	2 sec., 45 lbs.
Height, 6 $\frac{1}{2}$ in.; width, 17 $\frac{3}{4}$ in.; depth, 20 $\frac{1}{2}$ in.		

This section offers a good combination where one drawer for 5 x 8 cards and one drawer for 4 x 6 cards, are required.

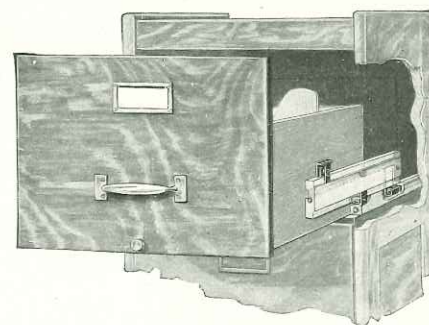

Card Index Section

With 2 drawers 5 x 8 and 3 drawers 3 x 5 cards.

No.	Code	Weight, Boxed
No. 306.	Singsang	2 sec., 80 lbs.
Height, 12 $\frac{3}{4}$ in.; width, 17 $\frac{3}{4}$ in.; depth, 20 $\frac{1}{2}$ in.		

This section can be used for large stock records, etc., in connection with 3 x 5 in. card record systems.

Our Improved Roller Bearing

Is used on all vertical file drawers, except No. 220 upright vertical file, page 24. This Roller Bearing has ten points of contact, five on each side of drawer, raising the drawer above all frame work, thereby reducing all friction. Metal Rollers, "not fibre."

Closed tops and bottoms on all sections, making them dust-proof.

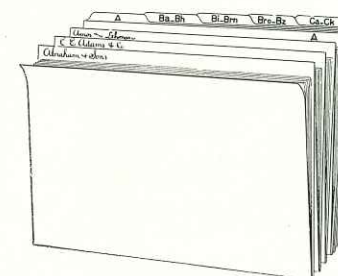

Figure capacity against price and then add our quality

Legal Cap Section
(LEGAL CAP SIZE)

You file front to back in this section, not "side-ways." Supporters underneath the drawer. Full Roller Bearing.

No.	Code	Weight, Boxed
No. 310.	Sinkender	2 sec., 80 lbs.
Height, 12 $\frac{3}{4}$ in.; width, 17 $\frac{3}{4}$ in.; depth, 20 $\frac{1}{2}$ in.		
Drawers are 10 $\frac{1}{2}$ in. high x 15 $\frac{1}{4}$ in. wide inside.		

Guides and Folders

May be found listed in Supply Catalogue No. 109.

Open Folder

The Vertical File Folders open up like a book.

Legal Blank Drawer

Each drawer has two compartments, each compartment measuring a full 9 x 15 x 1 $\frac{1}{4}$ in. high inside, a total of 14 compartments in the section. Dovetailed joints, 3-ply built-up veneered bottoms, well finished inside.

Description given on pages 6-7-17
See separate Price List

Stack No. 10

Consisting of :

- 1 No. 302, page 18;
- 1 No. 309, page 20;
- 1 No. 311, page 21;
- 1 No. 300, page 18.

Small, practical outfit for lawyers.

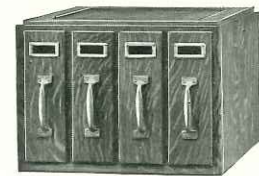

Legal Blank Section

No.	Code	Weight, Boxed
No. 311.	Sinkwerk	2 sec., 80 lbs.
High	Wide	Deep
12 $\frac{3}{4}$ in.	17 $\frac{3}{4}$ in.	20 $\frac{1}{2}$ in.

This section contains 7 double drawers with removable partitions. (See illustration of drawer) used for legal blanks, electrotypes, drawings, etc.

No swelling, warping, sticking or binding when using our drawers

Flat File Section

LETTER OR LEGAL CAP SIZE

No. 212.	Letter	Code	Weight, Boxed
No. 213.	Cap	Sinnaka	2 sec., 75 lbs.
		Sinnamine	2 sec., 75 lbs.
	High	Wide	Deep
	12 $\frac{3}{8}$ in.	17 $\frac{3}{4}$ in.	20 $\frac{1}{2}$ in.

Each drawer fitted with spring compressor. Indexes extra.

Flat File Drawer

Drawer made with dovetailed joints; body of drawer finished well, producing neat appearance when out of section. 3-ply veneered bottoms. Indexes extra.

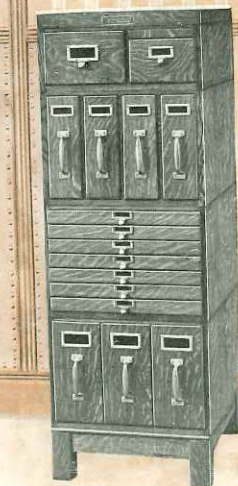

Storage Drawer

Inside measurement:

High	Wide	Deep
3 $\frac{3}{8}$ in.	15 $\frac{1}{4}$ in.	18 $\frac{3}{4}$ in.

Dovetailed corners. 3-ply veneered bottom, $\frac{1}{4}$ in. thick.

Stack No. 5

Consisting of:

- 1 No. 301, page 18;
- 1 No. 315, page 23;
- 1 No. 311, page 21;
- 1 No. 312 or 313, page 22;
- 1 No. 307, page 20;
- 1 No. 300, page 18.

Splendid Combination Lawyer's Outfit.

Storage Drawer Section

No. 314.	Code	Weight, Boxed
	Sinnbilder	2 sec., 80 lbs.
		Height, 12 $\frac{3}{8}$ in.; width, 17 $\frac{3}{4}$ in.; depth, 20 $\frac{1}{2}$ in.

Used for storing stationery, catalogues, etc. (See illustration of drawer.)

Description given on pages 6-7-17
See separate Price List

Cast brass hardware on all sections

Catch on rear of all Wage-makeretts to prevent tipping

Set our goods in center of office--they have finished backs

Cupboard Section

No. 316	Code	Weight, Boxed
	Sinneth	2 sec., 55 lbs.
		Height, 12 $\frac{3}{8}$ in.; width, 17 $\frac{3}{4}$ in. 20 $\frac{1}{2}$ in. deep

Inside measurement of cupboard:

Width	Height	Depth
16 $\frac{1}{4}$ in.	10 $\frac{1}{8}$ in.	19 $\frac{1}{4}$ in.

Door fitted with lock and key.

Document File Section

No. 315	Code	Weight, Boxed
	Sinnenlust	2 sec., 70 lbs.
		Height, 12 $\frac{3}{8}$ in.; width, 17 $\frac{3}{4}$ in. 20 $\frac{1}{2}$ in. deep

For filing envelopes 10 $\frac{1}{4}$ x 4 $\frac{3}{4}$. Partition between each file. See illustration of file.

Document File Pocket

Listed in Supply Catalog No. 109.

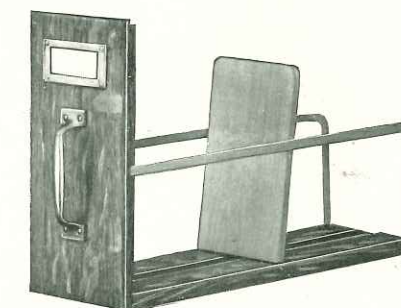

Stack No. 3

Consisting of:

- 1 No. 301, page 18; 1 No. 316, page 23;
- 1 No. 309, page 20; 1 No. 311, page 21;
- 1 No. 315, page 23; 1 No. 300, page 18.

Outfit for real estate, lawyers, etc.

Vertical Upright Files

These Vertical Files culminate the work of many laborious hours to manufacture a vertical upright file, which contains the combined improvements found in the files on the market today. Each file may have a certain feature over the other, but we claim to have all the new features into one vertical upright file.

Our Features

1st—All drawers are made 10½ inches high inside, where formerly they were made 10 inches high. This means more room for guides.

2nd—We make the files shown on pages 26 and 27 with a sanitary and plain base. The bases are made on the sectional plan, so that the cabinet can be set on either base.

3rd—These files are made with an open end without panels, and also with closed or panel ends, finished all around. This construction includes No. 220, page 25.

4th—Nos. 225 and 230 file drawers are suspended on full set of roller bearings, described on pages 6 and 26.

FIG. 3

Vertical Upright Files, "Combinations"

These three upright files we illustrate to show the possibilities in placing several arrangements of drawers in one cabinet.

The regular 4 drawer vertical upright files in which we can arrange these various combinations are the No. 220 on page 25, or the cabinets found on pages 26 and 27, Nos. 225 and 230. We simply take one or more vertical file drawers out of these cabinets and insert in these openings the following, one outfit in the place of each vertical file drawer. These combinations are not carried in stock.

- One 4 drawer 3 x 5 inch section.
- One 4 drawer 4 x 6 inch section.
- One 3 drawer document section for filing envelopes, 4 x 10½ inches.
- One 7 drawer legal blank section.
- One cupboard section.

Construction

These Cabinets are listed on separate Price List, open or panel end. The open end Cabinets are used in a large stack of files, in which case the two outside Cabinets should be paneled ends.

This entire Cabinet is made of the same construction as Nos. 225 and 230, with the exception that it has 3-ply veneered plain back, 3-ply veneered top and extension slides on side of drawers without Roller Bearing. Each drawer is equipped with Center Rod and Follower Block. Oxidized hardware.

Solid Card Index Cabinets

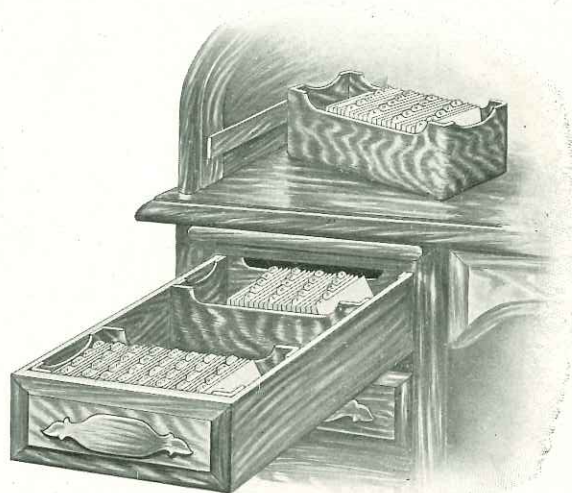

All Wagemaker solid card index cabinets have dovetailed joints with rounded corners, and are therefore PERFECTLY rigid and strong.

The Cabinets are Finished all around and present a plain rich appearance. Made in quartersawed White Oak, Birch Mahogany finish and solid Mahogany.

Note that each is designed to take up the least possible space, and two or more outfits may be placed on top of one another or side by side without the loss of any space.

Each Drawer is fitted with our regular adjustable follower block inside to hold the contents at all times in an upright position, ready for reference.

Our Card Index Cabinets are NOT regularly equipped with locking device for cards. Any locking device is clumsy in these systems at its best, and for the purpose they are intended are not worth the inconvenience necessary in using them. They frequently become unused and are eventually laid aside as a nuisance, having been originally intended for a selling point.

Card Index Desk Drawer Trays

Each box is fitted with a slanting card rest in front and an adjustable follower block for holding the contents at all times in an upright position. Each tray is supplied with rubber feet to prevent scratching. Made lock cornered, neatly rounded.

Sizes of Trays

3 x 5				4 x 6				5 x 8

Solid Check File Cabinets

Check Filing Systems

Check Filing Systems are used for filing away, for accurate future reference, cancelled checks, notes, drafts, contracts, etc. The systems provide for filing these papers by the straight alphabetical arrangement, according to the name of person or company issuing same, or according to the name of the one in whose favor the paper is made out. The filing drawers may be divided by means of special printed guides of a different color or the names of different individuals and concerns, or the papers can be filed numerically. This system can be carried out successfully because such papers are invariably numbered.

The Follow-up System can also be carried out in these filing drawers for filing papers to be cared for at a certain date ahead. Notes and contracts can thus be given the closest possible attention. In this system one set of monthly guides with twelve sets of daily guides, each set numbered from 1 to 31, and one set used in front of each monthly guide, making up a complete Follow-up System. The system may, however, be carried out successfully with three or six sets of daily guides together with the monthly guides, by simply moving the sets of daily guides forward through the year as each month is finished.

The Filing Drawers are of sufficient size to provide for filing papers of the size 4 x 10 inches.

Material Construction and Finish of all Check File Cabinets

The Cabinets are Made in quartersawed White Oak, Birch Mahogany and solid Mahogany.

Finish—Our new Satin Dull Rubbed finish.

Hardware—Solid Cast Brass Hardware, in the old or dull finish.

One and Two Drawer Check File Cabinet

Made box style, with dovetailed joints and neatly rounded corners. Drawers are made lip front, making them dust proof, also dovetailed joints front and back. Each drawer is finished inside and out with our new white finish and equipped with our adjustable follower block inside to preserve the contents at all times in an upright position, ready for reference. Inside dimensions of drawers are 4½ inches high, 10 inches wide and 16½ inches long.

Check File Guides

The guides used in these systems are all made from heavy gray press board stock, and all papers filed between them will be kept perfectly smooth and flat.

Can be purchased with or without lower projection.
